Key Findings & Recommendations

Based on analysis of 7,043 telecom customers

18	$139.13K	970
Avg Tenure Churned	Monthly Revenue Lost	At Risk Customers

01 — Contract Strategy

Finding: Month-to-month customers churn highest (50.8%), especially in the first year.

Action: Target them early with discounted annual plans around month 3.

Expected impact: Improves retention and can recover ~$8K/month.

02 — Payment Friction

Finding: Electronic check users churn ~1.5× more due to payment friction.

Action: Nudge them to switch to auto-pay with small incentives.

Expected impact: Improves customer retention and reduces churn.

03 — Service Quality Issues

Finding: Fiber users show high churn despite higher pricing, indicating service issues.

Action: Investigate and fix service quality (speed, reliability, pricing).

Expected impact: Prevents loss of high-value customers and revenue.
